Opto-Mechatronics Devotee
Learning whatever the system demands to

A **Opto-Mechatronics Devotee** who is dedicated to the process of creating sensors and actuators for solving real-world problems especially in the field of healthcare enabling better diagnostic and surgical procedures.

Experience

Istituto Italiano di Tecnologia, Genova, Italy — *October* 2019 – *Present*
Research Fellow — Advanced Robotics Lab

I'm involved in the UI team of TELEOPERAZIONE project. [link]

- Developing Multi-threaded and Multi-Process solutions in C & C++ for real-time audio, video, and point-cloud streaming.
- Integrated of Gas, Temperature and Thermal sensors with Linux system.
- Created URDF for hannes hand.

Indian Institute of Science, Bangalore, India — *February* 2018 – *June* 2019
Project Assistant — Robert Bosch Centre for Cyber-Physical System

I was involved in developing a **quadruped robot** called *Stoch*. We used Deep Reinforcement Learning to generate the end point trajectory and realized on hardware using Central Pattern Generator. [link]

- Straight line trajectory tracking using IMU.
- Sensors and actuators, interface with linux based single board computers.
- Inter Process Communication between drivers in C and Python using shared memory enabling low latency.
- Non-Blocking I/O for controlling the robot during teleoperation.
- CAN bus communication between two debian based system.
- Real-Time Embedded Programming on STM32F4 board using ChibiOS (Basics).
- A thorough understanding of servos (inner-working), actuator design (Quasi Direct Drive. 4Q control, compliance) and overall mechatronic system architecture through literature survey.

ASIMOV Robotics Pvt. Ltd, Kochi, India — *July* 2017 – *December* 2017
Intern — Software Development (R&D) Division

We developed a **banking service robot** and arm manipulators for specific clients. [link]

- Gravity compensation of arms for assistive mode.
- Position and Velocity control of DC motor in Arduino using PID.
- TCP/IP communication between ROS and non-ROS module.
- Motion planning simulation in Gazebo using ROS and MoveIt.
- Sensor Integration such as IMU, Tactile (FSR) and Ultrasonic.

Education

- B.S. Abdur Rahman University, Chennai, India — *August* 2013 – *May* 2017
  Bachelors of Technology in Mechanical Engineering — CGPA: 8.45 / 10.00
- GRT Mahalakshmi Vidyalaya Matriculation Higher Secondary School, Chennai, India — *March* 2013
  12th Grade, Tamil Nadu State Board — Percentage: 88.00 %
- A.V. Meiyappan Matriculation Higher Secondary School, Chennai, India — *March* 2011
  10th Grade, Tamil Nadu Matriculation Board — Percentage: 87.40 %

Research Interest

- Bio-compatible sensors and actuators for medical robots.
- Application of MEMS and optics for novel design of medical imaging sensors.
- Application of control and optimization techniques in real-time on robots.
- OCT, Two-Photon Imaging, Con-focal Imaging, Photoacoustic Imaging.
- Continuum and Hand-Held robots.

Projects

- Robotic arm simulation in Gazebo using ROS and MoveIt [link]
- Basics of a Motor [link]
- Actuators for dexterous and agile robots. [link]
  - A robot is a bunch of actuators connected. Thus, it is of prime importance to exactly understand the requirements on the hardware to build a dexterous, agile and robust robot.
- Smart Intravenous Dripper. [link]
  - Automation of Intravenous drippers to prevent air-embolism and reversal of blood-flow in the patients.
- Open-Source BLDC driver with CAN communication. [link]
  - An attempt to make customized BLDC driver based upon open source hardware which resulted in a huge learning for me.

Publication(s)

[Google Scholar], [ORCID ID], [arXiv identifier]

- Dholakiya D., Bhattacharya S., **Ajay G.**, Singla A., Shalabh B., Bharatwaj A., Ghosal A., Shishir K., "*Design, Development and Experimental Realization of a Quadrupedal Research Platform: Stoch*" In Proceedings of 2019 IEEE International Conference on Control, Automation and Robotics (ICCAR 2019), Beijing, China. [video] [arXiv]

Technical skills

Programming	C, C++, Python, Html, MATLAB
Framework	ROS, MoveIt
CAD	Creo, SolidWorks
Simulation	Gazebo, ANSYS Workbench
Version & Build	Git, GitHub, Make, CMake, Catkin, Jekyll
Debugging Tools	OpenOCD, gdb, Valgrind, strace, ptrace
Single Board Computer	Raspberry-Pi, Odroid, Beaglebone, Jetson
Micro-controller	STM32F4 series (ARM Cortex-M4), Arduino
Bus & Network	CAN, I^2C, SPI, Serial, Socket (TCP/IP), MQTT
Servos & Motors	Dynamixel, Kondos, pwm servos, Maxon DC motor, stepper motors
Others	Doxygen, LaTeX, pandoc, markdown, MS-Office, Prezi,

Honors and Awards

- **Finalist, Top 10 out of 11,000+ applicants, in India Innovation Challenge Design Contest 2016** conducted by Department of Science and Technology, Government of India & Texas Instruments Inc., and anchored by Indian Institute of Management, Bangalore for our project, "Smart Intravenous Dripper".
- ISHRAE $2016 - 2017$ President in B.S. Abdur Rahman University and was responsible for organizing and conducting various events related to ISHRAE.
- Won 1st Prize in ISHRAE Chennai chapter Level Quiz by St. Joseph's College of Engineering, Chennai under the auspices of ISHRAE.
- Won 1st Prize in Technical Quiz at Confluence 2016, A National Level Technical Symposium.
- Finalist in the Semifinals of AQuest, An All India Inter-Collegiate Engineering Quiz Contest at Kolkata by ISHRAE.
- Won 1st Prize in Design of Heat Exchanger at Mechfest 2016, Technical Symposium.
- Won 1st Prize in Tamil Oration at A.V. Meiyappan Matriculation Higher Secondary School.
- Won 3rd Prize in Choreography at Festeve 2014 by Women's Christian College, Chennai.
- Won 3rd Prize in Burn the floor at Chrysalis 2014 by Loyola Institute of Business Administration, Chennai. Won 3rd Prize in Western Dance at Srishti 2014 by Ethiraj Collage for Women, Chennai.

Miscellaneous

- Took seminars on simulation of a robotic arm in Gazebo using ROS and MoveIt for students of Dr. Shishir Kolathaya and Prof. Ashitav Goshal.
- Internship (July 2016) at TIDC INDIA, Ambattur, India, where I learnt various process and methodologies involved in desgin and fabrication of cam chain used in two-wheelers.
- Internship (June 2016) at J.K. Fenner(India) Ltd, Sriperumbudur, India, where I learnt various process and methodologies involved in desgin and fabrication of rubber seal's used in bearings.
- In-plant Training (June 2015) at Ashok Leyland, Ennore, India, where I had a practical exposure to various manufacturing methods and assemble line production system.
- During my bachelors, I actively participated in various conference and workshops to enhance my knowledge across the technical domain.
